Explanations:

Formats:

Basically, *Midifiles* are always available in the file formats *SMF-0* and *SMF-1*, as well as in the sound formats *GM*, *GM2*, *GS* and *XG*. The entry *avh* means that the Midifile contains an arranged vocalist track on channel 16.
Playbacks are available in the audio format *MP3* with 192 kb/s resolution.

For more information, see *groups*.

Groups:

- **Midifile:**
  Is the short form for the sound formats *GM*, *GM2*, *GS* and *XG*.
- **Pro-Midifile:**
  Includes all formats of the *Midifile* group, as well as the sound format *XF* and special adjustments for the latest *Yamaha Tyros* devices (currently Tyros 5), the *Yamaha Genos and Genos 2* (as indicated) and the Korg PA series.
- **ProV-Midifile:**
  See *Pro-Midifiles*. These files are extended in *all* formats with an arranged Vocalist track on channel 16.
- **Bundle:**
  Contains individually available titles. You may save about 20-50% compared to buying all contained titles individually.
- **Playback:**
  A rendered audio file, based on the *Midifile*. Virtual instruments are used for rendering. No vocal melody is included (=Half-Playback).
- **Pro-Playback:**
  See *Playback*. A rendered audio file, based on the *Midifile*. However, much more effort is expended to produce the file as close to the original as possible. For example by the use of real guitars and an extended processing of the virtual instruments. Professional mixed and mastered.
- **ProV-Playback**
  See *Pro-Playback*. In addition, background vocals (chorus, second voice etc.) are realized.

TXT column:

- **TXT:** The lyrics are provided as text file (ASCII).
- **KAR:** Within the Midifile the lyrics are stored as Meta-Events in addition to the text file.
- **INS:** The song is an instrumental title, so there are no song lyrics.
